BTECH (SEM V) THEORY EXAMINATION 2023-24 OPTICAL COMMUNICATION

TIME: 3 HRS M.MARKS: 100

Note: 1. Attempt all Sections. If require any missing data, then choose suitably.

SECTION A

1. Attempt all questions in brief.

| Q no. | Question | Marks | CO |
|-------|-----------------------------------------------------------------------------------------------------------------|-------|----|
| a. | Discuss Mode field diameter. | 2 | 1 |
| b. | Explore why the Refractive Index (R.I.) of core and cladding are different. Which one has greater R.I. and why. | 2 | 1 |
| c. | Illustrate stimulated Raman Scattering. | 2 | 2 |
| d. | Explain Kerr Effect used in an optical communication. | 2 | 2 |
| e. | Discuss the concept of population inversion in Optical Source. | 2 | 3 |
| f. | Differentiate surface emitting LED and edge emitting LED. | 2 | 3 |
| g. | Illustrate Source to Fiber Power Launching in optical communication. | 2 | 4 |
| h. | Illustrate the importance of multiplication factor in avalanche photodiodes. | 2 | 4 |
| i. | Explain Quantum Limit in optical communication. | 2 | 5 |
| j. | Discuss receiver selectivity. | 2 | 5 |

SECTION B

2. Attempt any three of the following:

| a. | Explain Phase and Group Velocity with proper derivation. | 10 | 1 |
|----|----------------------------------------------------------------------------------------------------|----|---|
| b. | Illustrate the linear scattering losses in optical fibers with respect to | 10 | 2 |
| | a) Rayleigh Scattering | * | |
| | b) Mie Scattering | | |
| c. | Explain the requirement for optical sources to feed into fiber and optical modulation | 10 | 3 |
| | bandwidth. Enlist the advantage & Disadvantages of LASER & LED. | | |
| d. | Explain p-n junction photodiode. A photodiode has a quantum efficiency of 65 % when | | 4 |
| | the photons of energy 1.5×10^{-19} J are incident upon it. Evaluate (i) the wavelength at | | |
| | which the photodiode is operating (ii) the incident optical power required to obtain a | | |
| | photocurrent of 2.5 μA. | | |
| e. | Write a short note on the following terms. | 10 | 5 |
| | 1. Multichannel & Multiplexing Transmission Techniques | | |
| | 2. Eye Diagram Pattern Features | | |

SECTION C

3. Attempt any *one* part of the following:

| a. | A typical relative refractive index difference for an optical fibre designed for long | 10 | 1 |
|----|-----------------------------------------------------------------------------------------|----|---|
| | distance transmission is 1%. Estimate the NA and the solid acceptance angle in air for | | |
| | the fibre when the core index is 1.46. Further, compute the critical angle at the core— | | |
| | cladding interface within the fibre. It may be assumed that the concepts of geometric | | |
| | optics hold for the Fiber. | | |
| b. | Summarize between step index and Graded index fiber. Compute the cutoff wavelength | 10 | 1 |
| | for a step index fibre to exhibit single-mode operation when the core refractive index | | |
| | and radius are 1.46 and 4.5 mm, respectively, with the relative index difference being | | |
| | 0.25%. | | |

4. Attempt any *one* part of the following:

| a. | When the mean optical power launched into an 8 km length of fibre is 120 mW, the | 10 | 2 | |
|----|----------------------------------------------------------------------------------|----|---|--|
| | mean optical power at the fibre output is 3 mW. | | | |
| | Calculate: | | | |

| | | | | | Pri | nted | Pag | ge: 2 | of 2 |) |
|----------|--|--|--|----|------|------|-----|-------|---------------|---|
| | | | | Su | bjec | t Co | de: | KE(| C 05 8 | , |
| Roll No: | | | | | | | | | | |

BTECH (SEM V) THEORY EXAMINATION 2023-24 OPTICAL COMMUNICATION

TIME: 3 HRS M.MARKS: 100

| | THE PARTY OF THE P | 100 | |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------|
| | | | |
| | (a) the overall signal attenuation or loss in decibels through the fibre assuming there are | | |
| | no connectors or splices. | | |
| | * | | |
| | (b) the signal attenuation per kilometre for the fibre. | | |
| | (c) the overall signal attenuation for a 10 km optical link using the same fibre with | | |
| | splices at 1 km intervals, each giving an attenuation of 1 db. | | |
| | | | |
| | (d) the numerical input/output power ratio in (c). | | |
| b. | Illustrate Intermodal dispersion in detail. Derive rms pulse broadening due to intermodal | 10 | 2 |
| | dispersion in a multimode step index fiber. | | |
| 5. | Attempt any one part of the following: | | |
| J. | Attempt any one part of the following. | | |
| a. | Explain the principle, construction and working of semiconductor injection laser. Also | 10 | 3 |
| u. | | 10 | 3 |
| | define total efficiency and external power efficiency of a semiconductor injection laser. | | |
| b. | Explain heterojunction structure of LED. The radiative and non-radiative recombination | 10 | 3 |
| | lifetime of the minority carriers in the active region of a double heterostructure LED are | | |
| | | | |
| | 60 ns and 100 ns respectively. Evaluate the bulk recombination or total carrier | | |
| | recombination lifetime and power generated internally in the device when the peak | | |
| | wavelength is 0.87 μm at a drive current of 40mA. | | |
| 6 | | 1 | 1 |
| 6. | Attempt any one part of the following: | | |
| a. | Explain the construction and working of APD photo diode. Also explain the effect of | 10 | 4 |
| a. | | 10 | 0 |
| | temperature on gain of an avalanche photodiode. | | |
| b. | Explain P-I-N photodiode in detail. Also explain factors which limit the speed of a | 10 | 4 |
| | photodiode. | .0. | |
| | | | l |
| 7. | Attempt any one part of the following: | Ω_{s}^{*} | |
| | Explore Power Penalty in optical communication. Also Explain Different Types of | 10 | _ |
| a. | | 10 | 5 |
| | Power Penalties. Explore Error Control Techniques in detail | | |
| b. | Explore basic concept of Free Space Optics (FSO) based Communication System in | 10 | 5 |
| | detail and Explain Heterodyne Detection used in optical communication in details. | | |
| | detail and Explain receively to Detection used in optical communication in details. | | |
